

Mathias Lovera

FullStack Developer

About Me

+4 years of formal experience working with systems and developing on different programming paradigms. Looking for new challenges and places where I can achieve experience. I have knowledge on client and advisors management systems, as well as tools to improve the reliability with the users. My strong suit is app development, specifically with frontend and user interfaces.

Current Tools

Java / TypeScript
SQL / MongoDB
NodeJS / ExpressJS
Docker
GIT
GraphQL
React

Soft Skills

Organizational flexibility
Orientation to results
Initiative
Widely resolute
Pragmatic if required
Self taught
